ONE DATASET: A YEAR OF D..

This project started with a simple question: "How much insight can you extract from a single dataset when you keep asking better questions?"

Using one Superstore sample dataset, I challenged myself to build 12 dashboards, one for each month, each focused on a different business perspective. Instead of changing the data, I changed the **lens**: sales, customers, products, regions, and performance over time.

The dashboard brings those views together into a **single, time-based experience**, showing how the **same data tells a new story each month**. (August was unfortunately missed along the way)

SAVING YOUR WORK

Press the drop down arrow next to publish to save the workbook to your Tableau Public Profile.

If you don't publish the workbook, it won't save your progress.

THE INTERFACE

The screenshot shows the Tableau Public interface for a workbook titled "Olympic Gold Medals (Tableau Public)". The interface includes a menu bar (File, Data, Worksheet, Dashboard, Analysis, Map, Format, Help), a toolbar with various icons, and a main workspace labeled "Sheet 1".

On the left side, the "Data" pane is visible, showing a list of tables. A purple box highlights the "Tables" section, which contains the following variables:

- Abc Countries
- Abc Loc Code
- Abc Measure Names
- # Summer Bronze
- # Summer Gold
- # Summer Participations
- # Summer Silver
- # Summer Total
- # Total Bronze
- # Total Gold
- # Total Participation
- # Total Silver
- # Total Total
- # Winter Bronze
- # Winter Gold
- # Winter Participations
- # Winter Silver
- # Winter Total
- # olympics_medals_count...
- # Measure Values

A text box with a purple background and white text is overlaid on the interface, pointing to the highlighted list of variables. The text reads:

These are all of the variables found in the data. They are separated by variable type.

On the right side, the "Columns" and "Rows" shelves are visible, and a "Marks" card is set to "Automatic". A "Show Me" panel is also visible on the right, displaying various chart templates.

THE INTERFACE

The screenshot displays the Tableau Public interface for a project titled "Olympic Gold Medals (Tableau Public)". The top navigation bar includes menus for File, Data, Worksheet, Dashboard, Analysis, Map, Format, and Help. A "Publish" button and the user's name "Sydney Lanning" are also visible. Below the navigation bar is a toolbar with various icons for actions like undo, redo, and saving. The main workspace is divided into several panes: a left-hand pane for "Data" and "Analytics" showing a list of tables and measures; a central pane for "Columns" and "Rows" (currently empty); and a right-hand pane for "Marks" (set to "Automatic") and "Filters". A "Show Me" panel on the far right offers a grid of visualization suggestions. At the bottom, a "Data Source" pane shows "Sheet 1" selected. A purple box highlights the "Sheet 1" tab, and an arrow points from a text box to it. The text box contains the following text:

You can add multiple sheets/workbooks/dashboards to one project like an excel file.

THE INTERFACE

The screenshot shows the Tableau Public interface for a workbook titled "Olympic Gold Medals (Tableau Public)". The top menu bar includes File, Data, Worksheet, Dashboard, Analysis, Map, Format, and Help. The top right corner shows a "Publish" button, the user name "Sydney Lanning", and a close button. The left sidebar contains the "Data" pane with a search bar and a list of tables, including "Countries", "loc Code", "Measure Names", and various medal counts (e.g., "Summer Bronze", "Summer Gold", "Total Gold"). The "Columns" and "Rows" shelves are highlighted with a purple box and labeled "Sheet 1". The "Marks" shelf is set to "Automatic" and includes "Color", "Size", "Text", "Detail", and "Tooltip" options. The main view area is currently blank. A callout box with a purple background and white text points to the Columns and Rows shelves, stating: "These become the columns and rows of your visualized data when you drag variables into this section." The right sidebar shows a "Show Me" panel with various visualization templates and a legend for "highlight table use" with "Measure" and "Dimension" categories.

MAKE YOUR FIRST TABLE

Drag "Countries" and "Total Gold" to Columns and Rows.

Then, click on the "Text Table" visualization option.

YOU'VE MADE YOUR FIRST TABLE!

The screenshot shows the Tableau Public interface for a dataset titled "Olympic Gold Medals (Tableau Public)". The interface includes a menu bar (File, Data, Worksheet, Dashboard, Analysis, Map, Format, Help), a toolbar, and a sidebar with "Data" and "Analytics" tabs. The "Data" tab is active, showing a list of tables. The "Marks" card is set to "Automatic", and the "SUM(Total Gold)" variable is highlighted in a green box. An arrow points from a text box to this variable. The main view displays a table of countries and their total gold medals.

Countries	Total Gold
Afghanistan	0
Algeria	5
Argentina	21
Armenia	2
Australasia	3
Australia	170
Austria	91
Azerbaijan	7
Bahamas	8
Bahrain	2
Barbados	0
Belarus	21
Belgium	46
Bermuda	1
Bohemia	0
Botswana	0
Brazil	37
British West Indies	0
Bulgaria	55
Burkina Faso	0
Burundi	1
Cameroon	3
Canada	148
Chile	2
China	284
Chinese Taipei	7
Colombia	5
Costa Rica	1
Croatia	18
Cuba	84

The "Total Gold" variable moves to the marks section for further customization. (We'll get to that soon.)

FILTERING

The screenshot shows the Tableau Public interface for a worksheet titled "Olympic Gold Medals (Tableau Public)". The interface includes a menu bar (File, Data, Worksheet, Dashboard, Analysis, Map, Format, Help), a toolbar, and a sidebar with the Data pane, Analytics pane, Pages shelf, Filters shelf, Marks card, and Columns shelf. The Data pane shows a table named "olympics_medals_count" with columns for "Countries", "loc Code", and "Measure Names". The Marks card shows a green pill for "SUM(Total Gold)". The Columns shelf shows a blue pill for "Countries". Two context menus are open: one for the "SUM(Total Gold)" pill and one for the "Countries" pill. Both menus have a purple border. The "SUM(Total Gold)" menu includes options like "Filter...", "Show Filter", "Include in Tooltip", "Format Number...", "Find in Data pane", "Dimension", "Attribute", "Measure", "Discrete", "Continuous", "Edit in Shelf", "Add Table Calculation...", "Quick Table Calculation", and "Remove". The "Countries" menu includes options like "Filter...", "Show Filter", "Show Highlighter", "Sort...", "Show Header", "Include in Tooltip", "Edit Aliases...", "Find in Data pane", "Dimension", "Attribute", "Measure", "Edit in Shelf", and "Remove".

Press the drop down menu on either variable to filter the contents of the table.

DATA VIZ CHALLENGES

EASY

Pick a favorite country and arrange a bar chart of their Gold, Silver and Bronze Medals

Bonus: Make the three bars the colors of the country's flag

MEDIUM

Create a new variable with a calculated field.

Hint: Use $\text{Total Gold} / \text{Total Total}$ to find the percentage of medals that are gold medals per country.

HARD

Find a dataset that relates to your major and start exploring that data with new visualizations

Places to look for data:

- Statista
- Kaggle
- Google Dataset Search

SHARE YOUR VIZ

The screenshot shows the Tableau Public interface. At the top, there's a navigation bar with 'tableau public', 'Create', and 'Learn' buttons. A search bar is on the right. Below this is a blue banner with the text 'Save time building advanced charts with Trusted Viz Extensions → Free on Tableau Public'. The main content area displays a visualization titled 'Olympic Gold Medals by Sydney Lanning'. The visualization is a world map titled 'Total Olympic Medals by Country'. A share button (represented by a square with a circle and arrows) is highlighted with a purple box. An arrow points from this button to a text box on the right. A 'Share' dialog box is open, showing options to copy the embed code or the link.
